

TIPS TO IMPROVE YOUR ENGLISH VOCABULARY

Applications (apps) on mobile phones, such as ones offering a word of the day option

Many smartphones now have a feature where you can highlight a word and find its definition.

When reading books, it is a good idea to research any words that you do not know.

When there are words that you think you may find useful, note them down in a vocabulary journal.

The same can be done when reading newspapers, magazines, articles, etc., repeating the process of researching the word's definition and writing it down.

Putting subtitles on when watching TV or movies can help you to actually acknowledge what words are being used.

A fun way to improve your vocabulary is to do crosswords.

Synonyms are alternative words that can be used in place of a word you want to change.

Be patient and determined and your vocabulary will improve!
